PROFESSIONAL SUMMARY

Software Developer who graduated with a full scholarship in Computer Programming and is currently continuing education in Management Information Systems (GPA: 3.21). Built a strong foundation in software development, database systems, and analytical thinking throughout the academic journey.

Took an active role in web-based applications, SQL and PHP development, and full-stack project processes, adopting a results-oriented approach. Gained experience in developing scalable solutions, improving system performance, and enhancing user experience through effective teamwork and collaboration.

Projects include digital content platforms, financial technologies, student automation systems, AI-powered after-sales assistants, healthcare portals, cloud-based file management systems, and appointment management applications. These projects provided experience in building solutions across different industries, designing complex systems, and applying modern software development practices.

Currently focused on AI-powered automation systems, continuously improving technical skills and working toward building scalable, efficient, and user-centric digital solutions.

WORK EXPERIENCE

Game Developer

Jun 2022 – Sep 2022

Gamelab İstanbul

- Completed an internship as a Game Developer at Gamelab İstanbul, where a C++-based game was developed and released for Arnavutköy Municipality.
- Worked in the full-stack development phase of the project, contributing to both backend and frontend processes.
- Took an active role in database management using SQL, as well as in optimization and improving the UI/UX experience of the project.

Software Developer

Jul 2025 – Oct 2025

DOF Robotics

- Completed an internship at DOF Robotics as an AI and Python Software Developer, focusing on artificial intelligence development.
- Gained experience in Large Language Models (LLM) and RAG-based systems, improving technical knowledge in modern AI architectures and data retrieval methods.
- Contributed to the development of an AI-powered chatbot project for the company, taking part in different stages of design and implementation.

EDUCATION

Computer Programming

- Istanbul Gelisim University Vocational School
- Final CGPA: 2,91

Sep 2023 – Jul 2025

Management Information Systems

- Anadolu University, Faculty of Open Education (Eskisehir)
- Final CGPA: 3.21

Sep 2025 – Jul 2027

SKILLS

- SQL (Database Management & Querying)
 - PHP (Backend Web Development)
 - C++ (Game Development & System Programming)
- Python (AI & Automation Development)
 - Artificial Intelligence (LLM & RAG Systems)
 - Full-Stack Web Development
